EDUCATION

University of Washington, Seattle, Washington

Bachelor of Science (BS), Computer Science & Engineering, Expected Jun/2025

- Relevant Coursework: Data Structures and Parallelism, Algorithms, Hardware/Software Interface, Probability & Statistics, Research Seminar.

EXPERIENCE

Program Coordinator, Shoreline Community College (Shoreline, WA) Dec/2021 – Jan/2023

- Fostering a strong team dynamic with the Transitional Studies team, worked on tech-focused projects by leveraging diverse data sets and collaborating with students, faculty, and internal/external resources.
- Led a team of five-members to support students by troubleshooting IT challenges, streamlining class enrollment processes, setting up and configuring laptops, and executing key administrative tasks.

Web Developer & Database Designer, Herat Host IT Services (Herat, Afghanistan) Jan/2017 - Feb/2020

Largest software company in Herat with clients in Afghanistan and internationally

- Enhanced existing systems and engineered new systems/products using a diverse tech stack including JavaScript, PHP, SQL, GIT, Ajax, Bootstrap, HTML, and CSS.
- Collaborated with a five-member team to construct a database system for the U.S. military's healthcare services, successfully delivering a specialized hospital product tailored to the needs of the American Army.
- Completed and launched an innovative online product with a group of five for private universities, revolutionizing traditional paper-based processes into online systems now adopted by three+ universities.
- Developed and implemented an online teacher evaluation system, reducing processing time from 4 months to 20 days while digitizing the entire workflow.

TECHNICAL QUALIFICATIONS

Languages (Proficient): Java, PHP, MySQL, CSS, HTML
Languages (Familiar): Python, JavaScript, C
Libraries: Ajax, Bootstrap, jQuery
Tools: Git, Linux, LaTeX

Side Projects

Game of Life (Halting Problem)

- Developed and designed a universal Turing Machine, named 'Game of Life,' utilizing Java, advanced algorithms, and the foundational principles of computing learned in coursework.

Personal Website

- Created and conceptualized a personal portfolio website, implementing MySQL and PHP for the backend and seamlessly integrating Bootstrap, HTML, and CSS for the frontend.

GitHub Repository API

- Engineered a web application that features advanced username-driven search capabilities, allowing precise access to projects and GitHub repositories, built using JavaScript, the GitHub API, HTML, and CSS.

ADDITIONAL EXPERIENCE

Customer Services Rep II, HomeStreet Bank, (Seattle, WA) Jan/2023 – April/2023

- Manage banking operations including deposits, account setup, ATM oversight, and balance branch assets; and excel in high-pressure communications with customers and managers to ensure safety and fairness.

Volunteer Assistant, Ada Developers Academy (Seattle, WA) Sep/2022 – Jan/2023

- Support engineers by assigning tasks, promoting best practices, overseeing development, and offering technical expertise to the team.
